DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an apparatus for lawn cutting, classified in class 56, subclass 10.2R.
- II. Claims 21-31, drawn to a method of cutting grass, classified in class 56, subclass Dig. 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be used with a different product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Attorney Hoffman on 19 January 2005 a provisional election was made without traverse to prosecute the invention of I, claims 1-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 21-31 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney John Hoffman on 21 January 2005.

The application has been amended as follows:

Claim 1, line 11, "control unit" has been changed to –control unit means—;

Claim 1, line 15, "the blade speed signal" has been changed to –a blade speed signal—;

Claim 1, line 18, "a blade speed signal" has been changed to –said blade speed signal—;

Claim 7, line 5, "torque" has been changed to –torque transmitting mechanism—;

Claim 14, line 5, "torque" has been changed to –torque transmitting mechanism—.
